Projects

Github Stats Viewer

Web application created using React, Tailwind and GitHub API. After entering the username, the user can view the GitHub stats of the entered user.

- Deployment - <https://github-stats-viewer.vercel.app/> 
- GitHub - <https://github.com/GokulAbisheak/github-stats-viewer> 

General Purpose ERP, *In development*

Backend of General Purpose ERP, built with Node.js, Express and MongoDB. Users can register their business in the system and handle their business functions. Services provided - Employee Management, Customer Management, Finance Management and Inventory Management.

- Initial Deployment - <https://general-purpose-erp-backend.onrender.com>
- GitHub - <https://github.com/GokulAbisheak/general-purpose-erp-backend>

Frontend of General Purpose ERP, built with React and Tailwind. Users can register their business in the system and handle their business functions. Services provided - Employee Management, Customer Management, Finance Management and Inventory Management.

- Initial Deployment - <https://general-purpose-erp-frontend.vercel.app/> 
- GitHub - <https://github.com/GokulAbisheak/general-purpose-erp-frontend> 

Flowstate Fitness, *Group Project*

Designed and developed a web application for Flowstate Fitness Center using MERN stack, Material UI and React-Redux. The system has computerized all the business functions of the fitness center. Including e-membership which automatically generates a QR code for members which can be scanned inside receptionist login. It shows the membership status of the user.
